

## max **RACK-UP**<sup>®</sup> SERIES Model RU-MX4 Pro Audio Mic/Line Mixer

### ANYWHERE YOU NEED...

- Four Channel Audio Mixer
- XLR Microphone Inputs, Phono Line Inputs
- Switchable Phantom for Each Mic Input
- Mic or Line XLR Output, Switchable
- Unbalanced Line Output and Direct Input
- Studio Quality, Low-Noise Performance
- Integral Compressor/Limiter, Switchable
- Expansion Bussing Capability
- Output Isolation Transformer (RU-MX4T)

### *You Need The RU-MX4(T)!*

The RU-MX4 is part of the group of RDL RACK-UP products. The compact design permits high-density installations, with three products mounted in a single rack unit. The RU-MX4 may be used alone, or mounted using a wide variety of RACK-UP series options.

**APPLICATION:** The RU-MX4 is the ideal choice in many applications where a combination of balanced mic and/or unbalanced line-level signals needs to be mixed. All balanced connections are made through XLR connectors. Unbalanced signals are coupled through phono jacks.

Each of the four RU-MX4 inputs can accept either a balanced XLR mic or an unbalanced line-level phono input. Each **MIC** input accepts either a dynamic or a condenser microphone. A **PHANTOM** switch is located below each microphone input. These switches activate the phantom voltage and set the input preamplifier for the optimum gain range for the type of microphone. An integral high-pass filter rolls off frequencies below 80 Hz.

A separate unbalanced **DIRECT** input allows an external audio source to be summed directly into the mix amplifier, bypassing the front-panel input level controls. The unbalanced phono jack **LINE OUTPUT** from one RU-MX4 may connect to the unbalanced input of other equipment, or may be connected to the **DIRECT** input of another RU-MX4 to expand mixing capabilities. Up to 3 RU-MX4 mixers may be rack mounted in a single rack unit using an RDL RU-RA3HD rack adapter. A power interconnect cable is supplied with each RU-MX4 allowing the rack mounted mixers to run from a single 24 Vdc power supply.

The RU-MX4 provides one balanced output, switchable for mic or line level. The balanced XLR output and the unbalanced phono jack output may be used at the same time.

Audio levels are adjustable on the front panel. A convenient label area is provided below each fader knob. A label tab included with the mixer may be professionally labeled using a commercial lettering machine, or the user may write on the tab. The tabs lock into a pocket behind the front panel laminate to produce a professionally labeled appearance.

Each input channel is equipped with a front-panel dual-LED VU meter that follows standard VU ballistics. A green LED illuminates at 15 dB below the optimum input gain, becoming progressively brighter with increasing audio level. The adjacent red LED illuminates when the input gain exceeds the correct operating level.

The final mix is displayed on an LED string VU meter featuring a visually comfortable arc motion. The outputs may be fed directly from the final mix, or may be routed through the integral compressor/limiter. A rear-panel switch allows the soft-knee compressor to be switched in or out. When active, the compressor/limiter begins acting as signals exceed 6 dB below the normal output level, and maintain an average +4 dBu output level for excessive signal levels up to 20 dB. An optional security cover (RU-MX4SC) is available to prevent user access to the rear panel switches. The RU-MX4 is electronically balanced. A factory installed output isolation transformer is available by ordering the RU-MX4T.

Wherever a mixer is needed to provide superior audio clarity, user adjustments, reliability, compactness and unsurpassed versatility, the RU-MX4 is the ideal choice. Use the RU-RA3HD rack-mount adapter to mount multiple mixers, or to combine related products (such as audio or video distribution, or audio metering) into a single rack unit!

## Model RU-MX4

### Professional Audio Mic/Line Mixer

### Installation/Operation

EN55103-1 E1-E5; EN55103-2 E1-E4

Typical Performance reflects product at publication time exclusive of EMC data, if any, supplied with product. Specifications are subject to change without notice.

### TYPICAL PERFORMANCE

Microphone Inputs(4):  
Microphone Input Level:  
Line Inputs (4):  
Line Input Level:  
Gain Adjustments (5):

2 kΩ balanced, switchable 24 V phantom (IEC 1938: 1996-12)  
-58 to -20 dBu (**PHANTOM OFF**); -41 to -4 dBu (**PHANTOM ON**) for +4 dBu output  
2 kΩ unbalanced  
Line: -25 dBV to +20 dBV for +4 dBu output; -10 dBV nominal  
Mic: Off to 62 dB gain (**PHANTOM OFF**); Off to 62 dB gain (**PHANTOM ON HI GAIN**);  
Off to 46 dB gain (**PHANTOM ON LO GAIN**)  
Line: Off to 27 dB gain

Output Attenuator:  
Frequency Response:

Mic:  
Line:

80 Hz to 30 kHz (+/- 1.5 dB), <-10 dB @ 20 Hz (integral high-pass filter)  
20 Hz to 30 kHz (+/- 0.25 dB)

THD+N:

Mic:  
Line:

< 0.1% (80 Hz to 20 kHz)  
< 0.02%

Residual Noise (below +4dBu output):

40dB Gain, **LO GAIN**:  
50dB Gain, **HI GAIN**:  
60dB Gain, **HI GAIN**:

4 line level sources (unity gain): < -82 dB (wideband)  
Mic: -79 dB; all 4 mic level sources: < -73 dB (wideband); < -76 dB ("A" weighted)  
Mic: -79 dB; all 4 mic level sources: < -73 dB (wideband); < -76 dB ("A" weighted)  
Mic: -70 dB; all 4 mic level sources: < -64 dB (wideband); < -66 dB ("A" weighted)

Outputs (2):  
Indicators (18):

+4 dBu 150 Ω balanced (switchable **MIC** or **LINE**); -10 dBV unbalanced  
Dual-LED VU meter for each input  
**COMPRESSION/LIMITING** active LED  
**POWER** LED

Power Requirement:  
Overall Dimensions:

8-segment bar mode string LED audio mix level meter, 0 dB = +4 dBu  
VU ballistic: -20 dB, -10 dB, -6 dB, -2 dB, 0 dB, +3 dB; Peak reading: +8 dB, +12 dB  
24 Vdc @ 150 mA, Ground-referenced  
Height: 1.7 in. 4.3 cm  
Length: 5.8 in. 15.0 cm  
Depth: 4.8 in. 12.2 cm
